## **Voice & Data Systems Takes the Lead in Transitioning Customers' IT Networks to Microsoft Azure**

*Leading Managed Technology Services Provider Helps Organizations Take Advantage of the Economic and Productivity Benefits of Moving to the Cloud*

OMAHA, NE AND COUNCIL BLUFFS, IA – February 25, 2025 - Voice & Data Systems, a leading managed technology services provider (MTSP), is helping organizations transition their IT networks to Microsoft Azure. Voice & Data Systems is empowering organizations to leverage the economic and productivity benefits of moving their network to the cloud. With growing IT complexity, rapid AI innovation and strong demand for flexible hybrid work environments, Voice & Data Systems is helping to navigate this transition as efficiently, productively, cost-effectively, and profitably for their customers.

"The days of managing bulky on-premise servers have long been over," said Steve Sawtell, President at Voice & Data Systems. "The maintenance costs, cybersecurity risks, obsolescence and restrictions that on-premise IT infrastructure pose is no longer a liability business owners need to tolerate. Small to mid-sized businesses (SMBs) and non-

profits are moving to Azure because there's no need for them to host physical servers. More than ever, organizations are searching for ways to reduce operating costs, speed up the pace of collaboration and give their team more flexibility to accomplish their work, in a way that works for their lives. While the cloud has been nascent technology in years past, we've now reached the point in its development where it's simply a superior technology and we foresee it enveloping on-premise servers."

By moving to Azure, organizations no longer need to invest in physical servers, expensive leases or security efforts to secure them. This translates into significant cost savings and opens the door to a more agile IT environment. Additionally, Azure eliminates the problem of scattered data, enabling seamless collaboration across tools which integrate with everything that staff are already familiar with. While cost-efficiency and collaboration are most obvious explanations for why so many organizations are switching to Azure, the most significant reason is because of how it bolsters cybersecurity.

Everyone can now leverage all the resources that Microsoft is pouring into cybersecurity. In fact, Microsoft has committed to invest \$5 billion and also employs over 5,000 security professionals who are constantly figuring out ways to improve cybersecurity for every user. Since Microsoft has more resources and expertise at their disposal, organizations can expect to enjoy superior uptime and reliability which will far exceed any individual business's capacity to deliver.

The shift to Azure aligns with key organizational objectives — like reducing large capital expenditures, improving collaboration and building a flexible infrastructure. Sawtell also added, "When customers realize they're already paying for Microsoft 365 licensing and can access premium tools without the burden of maintaining hardware, the choice becomes clear."

Their team is dedicated to guiding organizations through their transition to the cloud, ensuring a smooth process that prioritizes uptime, data security, and business continuity. Their focus is on simplifying networks, minimizing customer responsibilities, and equipping

business owners with IT systems that can grow without constraints.

“With Azure, organizations aren’t just upgrading their IT infrastructure; they’re future proofing it,” said Sawtell. “We’re excited to help unlock the power of the cloud, enabling all to achieve more with less.”

## **ABOUT VOICE & DATA SYSTEMS**

Voice & Data Systems provides state-of-the-art technology solutions for businesses throughout the Midwest and Great Plains from their headquarters in Omaha, Nebraska. The company implements strategies and customizes solutions that are specific to their customer’s requirements for Managed IT Services, Business Phone Systems, Surveillance, Access Control, Wireless and Cabling Infrastructure.

Voice & Data Systems serves a diverse customer base that includes Private Business, Commercial, Educational, Health Care, Public Utilities, Hospitality, Industrial, Utilities, Religious Entities, Local, State and Federal Government including the Military. Their mission is to provide specific technology solutions that increase their customers’ profitability, improve employee productivity, and give them a competitive advantage in their marketplace.
